

Out the class collaborationist union leaders in France! General strike committees in every workplace- occupy, resist! Down with the imperialist regime and the Sarkozy government!

The trade union leaders have deliberately delayed in calling all the masses out to fight the attacks on workers pensions. They shield the imperialist regime at every step. Now they organize symbolic actions on the 28th October and 6th November while the know the lower house is voting on it on the 27th Oct. They should have organized the millions to come out and face the parliament on the very day they dared vote on it and if these bandit representatives went ahead, the workers should have stormed parliament and dispersed it. Just like in Greece, the treacherous leaders refuse to call for the masses to overthrow the regime. Just like in Greece, the leaders they want to tire the masses out with endless street demonstrations.

Lutte Ouvriere, the NPA, the FT-CI and others are appearing at the barricades of the oil workers and other strikers making militant calls for 'indefinite' general strikes. Strikers need to ask them: *'You, who want to claim leadership of the struggle, you who have links right up into the union leadership and have international networks, what are you doing to mobilize the rest of the working class to come out on strike, what are you doing about the very leadership who does not want to call any broader action, that leaves us isolated? What are you doing about calling and organising the workers in the surrounding countries to blockade the oil and gas supplies that undermine our strike? You make no call for the toppling of the imperialist Sarkozy regime, so what is your call for an indefinite general strike for? So you can sound militant and make us believe you are our allies? So who has sent you? Your pay masters from the French banks, so you can betray our struggle from within? Prove yourself, fight for the programme below or step aside':*
